INDEX OF AUTHORS

Volume 48 January–June 1994 Russian Toms 331–333

Abasov, T. M. and Rubinov, A. M. *On the class of* $\mathbb{H}$*-convex functions* 95
Abgaryan, K. A. *An asymptotic transformation of the equations of a time-dependent multichannel automatic control system* 32
Alimov, Sh. A. *On spectral decompositions of distributions* 175
Allakhverdiev, B. P. See Maksudov, F. G.
Andreev, A. E. *Complexity and coding of Boolean functions* 122
Andrunakievich, V. A. and Ryabukhin, Yu. M. *Minimal right ideals of a ring relative to a fixed right ideal* 178
Antipin, A. S. *Controlled gradient saddle differential systems* 630
Antonets, M. A. *Initial-boundary value problems for evolution equations with a transmission condition on an unbounded surface* 286
Arkhipov, G. I. and Chubarikov, V. N. *On the asymptotics of the number of terms in a multidimensional additive problem with prime numbers* 1
Artem'ev, S. S. *Mean-square stability of numerical methods for solving stochastic differential equations* 539
Arutyunov, A. V. *On degenerate quadratic forms in the calculus of variations* 491
Babaev, A. A. and Musaev, B. I. *On solving a system of integro-functional equations of contact problems with nonlinear friction by Newton's method* 98
Bakhvalov, N. S., Knyazev, A. V., and Èglit, M. È. *An inequality of Korn type and orthogonal decompositions in spaces of matrices* 127
Baskakov, A. G. *Some conditions for invertibility of linear differential and difference operators* 498
Begmatov, Akbar Kh. *On a class of problems of integral geometry in the plane* 56
Beklaryan, L. A. *Invariant and projectively invariant measures for groups of orientation-preserving homeomorphisms of* $\mathbb{R}$ 387
———. *The structure of the quotient group of a group of orientation-preserving homeomorphisms of* $\mathbb{R}$ *modulo the subgroup generated by the union of stabilizers* 37
Belinskiĭ, È. S. *Strong summability of periodic functions and imbedding theorems* 255
Besov, O. V. *Imbeddings of Sobolev-Liouville spaces and Lizorkin-Triebel spaces on a domain* 130
Bitsadze, A. V. *Two-dimensional analogues of the inversion formulas of Hardy and Hilbert* 635
Bloshanskaya, S. K. and Bloshanskiĭ, I. L. *Generalized and weak generalized localization for multiple Fourier-Walsh series of functions in* L_p, $p \geq 1$ 359
Bloshanskiĭ, I. L. See Bloshanskaya, S. K.
Bogashov, F. A. *Representation of a biharmonic function in the complex space* C^2 259

Bolsinov, A. V. and Fomenko, A. T. *Orbital classification of simple integrable Hamiltonian systems on three-dimensional constant-energy surfaces* 365
Bratishchev, A. V. and Kalinichenko, L. I. *A description of the domain of convergence of a series of generalized exponentials* 183
Bronshteĭn, M. D. *On the Neumann problem for a semilinear elliptic equation with a control* 588
Cherepnev, M. A. See Sidel'nikov, V. M.
Chernorutskiĭ, V. V. See Vladimirov, A. A.
Chikriĭ, A. A. and Prokopovich, P. V. *The problem of evasion under interaction of groups of linear objects* 626
Chubarikov, V. N. See Arkhipov, G. I.
Clarke, F H. See Klark, F.
Dolzhenko, E. P. and Sevast'yanov, E. A. *Sign-sensitive approximations. The space of sign-sensitive weights. The rigidity and the freedom of a system* .. 397
———. *Sign-sensitive approximations. Uniqueness and stability questions* 415
Dubinskaya, V. Yu. *An asymptotic expansion of the solution of a steady-state problem of heat conduction in a thin plate with two periods of nonhomogeneities* 597
Dubinskiĭ, Yu. A. *On a nonlinear analytic problem* 370
Eger, V. [W. Jäger], Oleĭnik, O. A., and Shamaev, A. S. *On a homogenization problem for the Laplace equation in a partially perforated domain* 545
Èglit, M. È. See Bakhvalov, N. S.
Èĭdel'man, S. D. See Kondrat'ev, V. A.
Elkin, V. I. *Factorization and decomposition of affine control systems* 376
Ermolov, A. N. *Revelation of preferences in a Bayesian game-theoretic model of social choice* 515
Ershov, Yu. L. *Relatively regularly closed fields* 300
Ezhov, I. I. *On the distribution of queue length in a classical $G|G|1$ system with discrete time* 324
Fazullin, Z. Yu. *Abstract formulas for higher-order regularized traces for discrete operators* 114
Fedorov, S.I. *On the solvability of boundary value problems for a model of bending of a homogeneous plate* 659
Filippov, V. T. *On a decomposition of the variety of alternative algebras* 622
Fokin, M. V. *The existence of a singular spectrum and the asymptotic behavior of solutions in a problem of S. L. Sobolev* 529
Fomenko, A. T. See Bolsinov, A. V.
Gabasov, R., Kalinin, A. I., Kirillova, F. M., and Naumovich, G. N. *An asymptotically optimal regulator for a quasilinear system* 263
Gabasov, R., Kirillova, F. M., and Pokataev, A. V. *Network models and methods of nonlinear programming* 319
Gel'fand, I. M. and Graev, M. I. *Singular representations of the group $SU(n, 1)$ and projective unitary representations of the current group $SU(n, 1)^X$* 291
Gel'fand, I. M., Graev, M. I., and Retakh, V. S. *The q-hypergeometric equation of Gauss and a description of its series and integral solutions* 40
———. *(R, S)-hypergeometric functions of one variable* 591
Ginzburg, A. I. See Karapetyants, N. K.
Golichev, I. I. *Some iterative methods for solving inverse problems* 391
Goncharov, S. S. *Positive computable numberings* 268
Goppa, V. D. *Bounds for codes* 543
———. *The Frobenius-Young algebraic channel* 507

Graev, M. I. See Gel'fand, I. M.
Greenwood, P. E. and Ibragimov, I. A. *On asymptotically efficient Bahadur estimation* 221
Gurvich, V. A. *Biseparated graphs are perfect* 134
———. *Cyclic bilinear forms of enumerated graphs* 10
Gurvich, V. A. and Temkin, M. A. *The Berge conjecture is true for rotatable graphs* 271
Gushchin, A. K. and Mikhaĭlov, V. P. *A condition that a class of nonlocal problems for a second-order elliptic equation be Fredholm* 510
Guts, A. K. and Shalamova, N. L. *Affinely ordered Lie groups and axiomatization of pseudo-Euclidean geometry* 296
Härdle, W. See Ibragimov, I. A.
Ibragimov, I. A. See Greenwood, P. E.
Ibragimov, I. A., Kherdle, V. [W. Härdle], and Tsybakov, A. B. *On efficient estimation of an averaged derivative* 148
Ikromov, I. A. *On an estimate of the Fourier transform of the indicator of nonconvex sets* 71
Il'in, V. A. and Moiseev, E. I. *On some nonclassical features of a spectral problem for an elliptic operator with the condition that the oblique derivative be equal to zero* 445
Il'yasov, Ya. Sh. *Existence of periodic nonnegative solutions of the equations* $-\Delta u = g(u)$ *in* $\mathbb{R}^{N+1}$ 278
Imanaliev, M. I. and Pankov, P. S. *The phenomenon of a receding boundary layer in the theory of singularly perturbed ordinary differential equations*.. 602
Jäger, W. See Eger, V.
Kalinichenko, L. I. See Bratishchev, A. V.
Kalinin, A. I. See Gabasov, R.
Kalyabin, G. A. *On two-sided estimates and exact values of certain capacities* 192
Kalyuzhnyĭ, D. S. *The C^*-algebra generated by two-sided convolution operators on the Heisenberg group* 225
Kapitonov, B. V. *Simultaneous precise control of systems of linear elasticity*.. 332
Kapustyan, V. E. *Asymptotics of controls in optimal singularly perturbed parabolic problems. Global constraints on the control* 552
Karapetyants, N. K. and Ginzburg, A. I. *Fractional integrals in a limiting case* 449
Karatsuba, A. A. *The distribution of inverses in a residue ring modulo a given modulus* 452
Kats, B. A. *On the Riemann boundary value problem on a fractal curve*..... 559
Kerov, S. *Plancherel growth of Young diagrams, and the asymptotics of alternating sequences* 420
Khrennikov, A. Yu. *Discrete Q_p-valued probabilities*..... 485
Kirillova, F. M. See Gabasov, R.
Klark, F [F. H. Clarke]. and Ledyaev, Yu. S. *New finite-increment formulas*... 75
Kleshchev, A. S. *On restrictions of irreducible modular representations of semisimple algebraic groups and symmetric groups to certain natural subgroups* 425
Knyazev, A. V. See Bakhvalov, N. S.
Kondrat'ev, V. A. and Èĭdel'man, S. D. *On positive solutions of some quasilinear equations* 80
Koshelev, V. N. *On the problem of divisibility of sources and spaces* 231
Krasnosel'skiĭ, M. A. See Vladimirov, A. A.

Krasnosel'skiĭ, M. A., Maergoĭz, I. D. [Mayergoyz], Pokrovskiĭ, A. V., and Rachinskiĭ, D. I. *Differential equations with hysteresis nonlinearities of vector relay system type* 105
Krivosheev, A. S. *Systems of convolution equations in convex domains in* $\mathbb{C}^n$. 304
Kudryavtsev, L. D. *Generalized Steklov mean functions* 562
Kukushkin, N. S. *A new sufficient condition for the existence of equilibrium in the Cournot model* 195
Kurzhanskiĭ, A. B. and Nikonov, O. I. *Evolution equations for pencils of trajectories of synthesized control systems* 606
Kuz'minykh, A. V. *The inverse image of any nonextreme value of almost every continuous function has the power of the continuum* 14
Larin, V. B. *Computation of the square root of a solution of the algebraic Riccati equation* 153
Ledyaev, Yu. S. See Klark, F [F. H. Clarke].
Linke, Yu. È. *Sublinear operators and Banach spaces with the weak* $\mathscr{K}$*-analytic topology* 612
Lizorkin, P. I. *On approximation of functions on the sphere* σ. *On the spaces* $B^{\alpha}_{p,q}(\sigma)$ 156
Loginov, B. V. *On the determination of a bifurcation equation by its symmetry group* 200
Lukashenko, T. P. *Wavelets on topological groups* 236
Maergoĭz, I. D. [Mayergoyz] See Krasnosel'skiĭ, M. A.
Makarov, K. A. *Asymptotics of the Fourier transform of self-affine measures* .. 455
Maksudov, F. G. and Allakhverdiev, B. P. *On extensions of symmetric Schrödinger operators with matrix potentials* 240
Malyutin, K. G. *Sets of regular growth in a half-plane. Applications to interpolation* 520
Martynyuk, A. A. *On exponential stability with respect to some of the variables* 17
Mayergoyz, I. D. See Krasnosel'skiĭ, M. A.
Mel'nik, T. A. and Nazarov, S. A. *The asymptotic structure of the spectrum in the problem of harmonic oscillations of a hub with heavy spokes* 428
Mikhaĭlov, G. A. *Monte Carlo methods for solving metaharmonic equations of the form* $\Delta^{p+1}u + cu = (-1)^{p+1}g$ 21
———. *New Monte Carlo methods for computing critical values of parameters of the particle transport equation* 244
———. *Solutions of the equation* $\Delta u + u^n = 0$ *by the Monte Carlo method* 206
Mikhaĭlov, V. P. See Gushchin, A. K.
Mironov, A. A. *Generalized graphs with restrictions for the degrees of the vertices* 566
Moiseev, E. I. See Il'in, V. A.
Moiseev, N. G. *Partial factorization indices of a special class of matrix-valued functions* 640
Mukminov, F. Kh. *On uniform stabilization of solutions of the exterior problem for the Navier-Stokes equations* 248
Musaev, B. I. See Babaev, A. A.
Nagornyĭ, N. M. *A constructive model of classical formal arithmetic* 251
Naumovich, G. N. See Gabasov, R.
Nazarov, S. A. See Mel'nik, T. A.
Nikonov, O. I. See Kurzhanskiĭ, A. B.
Oleĭnik, O. A. See Eger, V. [W. Jäger]

Ostapenko, V. V. *A method of recovering a divergence difference operator from its divergence differential-difference analogues* 308
Ovsyannikov, L. V. *On optimal systems of subalgebras* 645
Pankov, P. S. See Imanaliev, M. I.
Pavlov, A. I. *On the number of equivalence classes of* $(0, 1)$*-matrices* 461
Pokataev, A. V. See Gabasov, R.
Pokhozhaev, S. I. *On a mathematical model of electrolysis* 402
Pokrovskiĭ, A. V. See Krasnosel′skiĭ, M. A.
Popov, A. G. *Exact formulas for constructing solutions of the Liouville equation* $\Delta_2 u = e^u$ *from solutions of the Laplace equation* $\Delta_2 v = 0$ 570
———. See Poznyak, È. G.
Poznyak, È. G. and Popov, A. G. *Lobachevsky geometry and the equations of mathematical physics* 338
Prokhorenko, V. I. *On asymptotic and pseudoanalytic solutions of a parabolic problem with a multidimensional perturbation* 46
Prokopovich, P. V. See Chikriĭ, A. A.
Rabinovich, V. S. *A criterion for local invertibility of Mellin pseudodifferential operators with operator symbols, and some of its applications* 465
Rachinskiĭ, D. I. See Krasnosel′skiĭ, M. A.
Rakhmonov, Z. Kh. *Mean values of the Chebyshev function* 85
Retakh, V. S. See Gel′fand, I. M.
Rozov, N. Kh. and Sushko, V. G. *The method of barrier functions and asymptotic solutions of singularly perturbed boundary value problems* 314
Rubinov, A. M. See Abasov, T. M.
Runovskiĭ, K. V. *Direct and inverse theorems of approximation theory in the spaces* L_p *with* $0 < p < 1$ 210
Ryabukhin, Yu. M. See Andrunakievich, V. A.
Ryazanov, V. I. *On quasiconformal mappings with locally summable deformation bound* 406
Rybnikov, Jr., K. A. *On the density of three-dimensional compacta* 110
Saburov, M. S. *On passage to the limit in singularly perturbed systems with variable small parameters* 470
Saks, R. S. *Generalized elliptic pseudodifferential operators on a closed manifold* 214
Savina, T. V. *On the law of reflection for higher-order elliptic equations* 380
Sedenko, V.I. *Classical solvability of an initial-boundary value problem in the theory of nonlinear vibrations of shallow shells* 88
Sekerin, A. B. *On the construction of entire and meromorphic functions of several variables having specified growth, and some applications* 282
Sevast′yanov, E. A. See Dolzhenko, E. P.
Shafiev, R. A. *Regularization methods for the multi-stage optimization problem* 168
Shalamova, N. L. See Guts, A. K.
Shamaev, A. S. See Eger, V. [W. Jäger]
Shapiro, L. B. *On* κ*-metrizable compact Hausdorff spaces* 534
Shishkin, G. I. *Difference approximation of the Dirichlet problem for a singularly perturbed quasilinear parabolic equation in the presence of a transition layer* 346
Shlyk, V. A. *Weighted capacities, moduli of condensers, and exceptional sets in the Fuglede sense* 353
Sidel′nikov, V. M., Cherepnev, M. A., and Yashchenko, V. V. *Systems of open distribution of keys on the basis of noncommutative semigroups* 384
Skopina, M. A. *Approximation of functions by quasipolynomials on convex sets* 343

Soldatov, A. P. *Problems of Dirichlet type for the Lavrent'ev-Bitsadze equation. I: Uniqueness theorems* 410
———. *Problems of Dirichlet type for the Lavrent'ev-Bitsadze equation. II: Existence theorems* 433
Starkov, A. N. *On multiple mixing of homogeneous flows* 573
Subbotin, A. I. and Subbotina, N. N. *Piecewise smooth solutions of first-order partial differential equations* 650
Subbotina, N. N. See Subbotin, A. I.
Sushko, D. V. *Convergence of a class of algorithms for the numerical solution of a convolution equation* 616
———. See Rozov, N. Kh.
Tabanov, M. B. *Billiard in an ellipse, geodesics on an ellipsoid, and new elliptic coordinates* 438
Tanana, V. P. *On a condition for minimality of locally convex spaces in the solution of ill-posed problems* 475
Temkin, M. A. See Gurvich, V. A.
Trifonov, S. I. *Analytic families of differential equations on two-dimensional varieties. Resolution of singularities, and singular perturbations* 162
Tsybakov, A. B. See Ibragimov, I. A.
Turmetov, B. Kh. and Umarov, S. R. *On a boundary value problem for an equation with a fractional derivative* 579
Tyrtyshnikov, E. E. *New theorems on the distribution of eigenvalues and singular numbers of multilevel Toeplitz matrices* 524
Ul'yanov, P. L. *On transformations of Fourier-Haar coefficients* 478
Umarov, S. R. *On some boundary value problems for elliptic equations with a boundary operator of fractional order* 655
———. See Turmetov, B. Kh.
Varshamov, R. R. *Some questions of projective arithmetic* 59
Vavilov, S. A. *On nontrivial solutions of certain classes of operator equations.* 4
Verbitskiĭ, V. A. *On multipliers of Fourier integrals with small interval of action* 67
Vladimirov, A. A., Krasnosel'skiĭ, M. A., and Chernorutskiĭ, V. V. *The Cauchy problem for systems with hysteresis* 502
Yakubov, V. Ya. *Sharp estimates for eigenfunctions, normalized in L_2, of an elliptic operator* 92
———. *Sharp estimates for normalized eigenfunctions of a Sturm-Liouville problem* 52
Yashchenko, V. V. See Sidel'nikov, V. M.
Yumagulov, M. G. *On an expansion of a periodic Green's function of equations with aftereffect in a series of exponential solutions* 117
———. *The method of functionalization of the parameter in iterative procedures for studying Hopf bifurcation for equations with aftereffect* 26
Yurko, V. A. *An inverse problem for selfadjoint differential operators on the half-line* 583
Zhura, N. A. *On the general solution of Leray-Douglis-Nirenberg systems with constant coefficients in the plane* 142
———. *The general boundary value problem for Douglis-Nirenberg elliptic systems of higher order with constant coefficients in the plane* 186
Zubov, V. I. *Exponential asymptotic stability* 328
